

**The Environmental Industry Associations’
HEALTHCARE WASTE INSTITUTE**

Our mission is to facilitate responsible healthcare waste management from all types of generators; to be the resource network for technical and regulatory assistance; and to be respected as a proactive, responsive and credible organization.

Our activities include:

The ability to deal with company-specific and industry-wide issues with the support of others in the industry and institute staff.

Educating legislators and regulators on key concerns and industry operations.

Facilitating relationships with the generator community.

Providing educational programs especially critical to companies that do not have full-time employees tasked to monitor regulations, legislation and new technologies.

Join today to be a leader in effective and practical management of healthcare waste.
