Coaching the Refuse Truck Driver II

Coaching the Refuse Truck Driver II is the premiere driver safety-training program exclusively for the solid waste service industry. The course is designed to go beyond the basics of handling a refuse vehicle and teach the practical and safe driving techniques that enable drivers to read and respond to traffic conditions. Drivers actively participate in the course by analyzing and discussing ways to handle potential collision situations. Key elements of the program are driver-trainer interaction and the ability to expand coverage of the topics to relate to specific company policy.

The video training program (also available in DVD format) includes the classroom video (DVD), a fully scripted instructor's guide, and the instructor's certification test. Each driver will need a Driver Response Book that includes a self-appraisal, video (DVD) follow-up questions and situation analyses, backing procedures review, collision reporting procedures, triangle placement procedures, and a course completion certificate. The video (DVD) training materials and Driver Response Books also are available in Spanish.

Full Package (Code S02-2)

Classroom video (DVD), Instructor's Guide, and Instructor's Certification Test

Quantity	Member	Non-Member	Quantity	Member	Non-Member
